

Chairman's Christmas Message 2019 Guyana

Christmas is considered to be one of the most joyous times of year, filled with festivities and gift giving. For businesses, this is also a great time to show appreciation to our employees for the time and dedication they spent throughout the year. So with this in mind I would like to extend a special Christmas wish and a happy new year to our devoted employees and their families.

We had a lot of challenges in our work this year and with your support and dedication, we have achieved success in all endeavors. I look forward to your continued support as we build upon what we already have, so that your dreams could be fulfilled and my vision for the organization can take form and that we continue to grow the company and capture a greater market share while increasing our profitability.

One of our milestones set for 2020 is being accredited with ISO 18788, 9001 & PSC1 by MSS GLOBAL. We will continue to lead the security industry and set the gold standards that others will follow. Our organization is lucky to have dedicated employees and your sacrifices have not gone unnoticed and as we prosper so would you. Our corporate family is something I cherish and as we grow together you will come to understand what I feel.

May God Bless you and enable us to continue to have the support of one another as we usher in the New Year. I also ask the Almighty to bring tons of success, good health, protection and prosperity to our lives and our loved ones. With growing confidence the future is waiting for us as I work alongside you to build an organization that we can all be proud of. I call it a work revolution at hand as we flex to meet our clients' needs and deliver service in excellence.

I promise to have open communication and encourage a culture of transparency, openness and honesty and my only expectations to be treated the same. In closing Merry Christmas and a Happy New Year from the Chairman and his Executive A team.

Chairman

Michael Aboud, Dr. Honoris Causa

(Entrepreneurship and Innovation from the University of Trinidad and Tobago.)
