FORENSIC INVESTIGATIONS SUPPORT PROGRAMME

FORENSIC INVESTIGATIONS SUPPORT PROGRAMME

In response to our region's need for advanced forensic services, Amalgamated Security Services Limited (ASSL) has launched Caribbean Forensic Services, a special purpose company to further support the regional fight against crime. Caribbean Forensic Services (CFS) offers regional Law Enforcement Agencies additional resources to stay up-to-date on newest forensic trends and developments and to be their regional supplier for equipment and services. Proper training in and understanding of such forensic supplies and technologies can result in the optimized collection, preservation and packaging of evidence before being sent to the forensic laboratory. In this regard, CFS provides the Caribbean Police Forces with the opportunity of having a regional partner for the timely and cost efficient analysis of such evidence.

As a further initiative in ASSL's partnership with ACCP, we are pleased to offer Caribbean Police Forces which are members of ACCP our Forensic Investigations Support Programme (FISP). On a yearly basis, CFS will offer you a variety of forensic tools to choose one from. Your tool of choice will be provided to you at no cost. Furthermore, a CFS representative can provide the necessary training in the use of it. It is our hope that this humble contribution may assist you on your way to an optimal use of forensic investigations and thereby contribute to our common goal of regional crime reduction.

To ensure maximum effectiveness and smooth flow of this programme, please select your forensic kit from the list attached and identify the person in charge of your forensic operations in the accompanying form. Please submit your completed form in hard or soft copy to CFS – attention Dr. Maurice Aboud.
